

# Genealogy Generation Chart

## To Begin Researching Your Family...

Check with family members and study home records (family Bibles, deeds, wills, photos, letters, etc.) to complete this chart. Your goal: to complete a Family Group Sheet (also available as PDF) for each couple listed on this chart. Estimate dates and places if exact information is not known. Example: List "around 1860" or "circa 1860" for an ancestor born "just before the Civil War" and "Tennessee" if the state is known, but not the city or county.
